# Main Layout

# Defined Dimensions: Spacing Ratios

These are the default dimensions when the tool first appears. Ratios are of the total space given to this widget depending on surroundings on page and window size

Minimum widget width is 700px. Beyond this point, browser window will need to side scroll.

# Defined Dimensions: Click-and-Drag Sizing

- Column widths can be adjusted (within bounds) by clicking and dragging right hand border.
- If width of records or subrecords column cuts off characters, show full name on mouse hover
- Minimum width: records column 120px, subrecords column 120px
- Maximum width: records and subrecords columns 300px each. Total widths of both columns added together cannot exceed 50% of overall widget width.
